

niquarryportal.com

gateway to sustainable quarrying

Industry Relevant Sustainability Information for the Northern Ireland Quarrying and Quarry Products Sector

niquarryportal.com is a dedicated space for all employers engaged in the extractives and quarry products industries to quickly access information, legislation and best practice experience in the area of sustainability.

Online resource covering four key themes to help you understand how to apply the requirements of sustainable development and be a responsible supplier to the construction industry:

Environment

Social

Economic

Compliance

niquarryportal.com will help your business to...

- Meet the requirements of the construction industry and customers in the most sustainable manner
- Be more resource efficient and reduce environmental footprint
- Implement high standards of environmental management
- Meet carbon reduction targets
- Improve biodiversity
- Make further improvements in Health & Safety performance
- Maintain and develop a competent workforce
- Be recognised that your operations are part of the local community and strive to be good neighbours
- Improve and extend your relationship with stakeholders
- Comply with legislation and reduce the risk of costly fines

This project has been funded by the Department for Employment and Learning Northern Ireland and developed by partners South West College, Quarry Products Association NI and the quarrying sector skills council Proskills.

Sustainability Training Programme

bespoke for the quarrying industry

Sustainability is high on the agenda of government, business and the wider public. The extractives and quarry products industry must be recognised and valued as suppliers of essential materials for a sustainable future, in a manner that is **economically viable** and **socially** and **environmentally responsible**.

Sustainability is of increasing importance to your everyday business protecting your license to operate, construction procurement, tendering success and in marketing.

To integrate sustainability into all aspects of decision making and build your business of the future, South West College and Proskills have worked with industry leaders and the Quarry Products Association NI to develop two new training courses:

Implementing Sustainability into Industry (OCN Level 3)

Course Aims:

- Gain a sound understanding of sustainability in industry
- Techniques to implement sustainability
- Methods to establish monitoring & reporting structures
- The business benefits of sustainability
- Develop toolbox talks on sustainability issues to embed sustainability as common practice

Output: Method to build a sustainable business, development of a set of toolbox talks to deliver to your employees

Audience: Middle Managers

Duration: 4 days

Accreditation:

Open College Network (OCN) Level 3

Sustainability for Senior Managers (OCN Level 3)

Course Aims:

- Understand sustainability as a three tiered strategy in relation to industry
- Sustainability as understood & applied by customers
- Use of sustainability to reduce regulatory burden
- The social, environmental & economic impacts (positive and negative)
- The need for leadership, planning, monitoring and reporting

Output: Development of sustainability policy for your own business.

Audience: Directors & Senior Managers

Duration: 1 full day

Accreditation:

Open College Network (OCN) Level 3
